Swiss Pearls SA - 2022 CSR report

Dear all,

During these often-challenging times of social, economic, ecological, Human rights and geopolitical difficulties, Swiss Pearls would like to reconfirm our commitment to maintain and promote responsible and ethical practices in our supply chain.

In this 2022 CSR report we especially want to remind our suppliers and partners that we do not directly source from any conflict areas, including Russia. We strongly encourage our suppliers and partners to align themselves with our commitments as well as follow and implement transparent sourcing policies to achieve higher due diligence standards in supply chains. Please note that we require full transparency on product origin from our suppliers.

Please refer to our Commitment Letter to ensure that we are aligned in our business ethics and values, and that every partner apply his due diligence on social, ecological, and Human rights' impacts. As far as we could investigate during this year, we couldn't notice any negative impact in our processes or with our employees and subcontractors.

We sincerely thank you for your efforts to improve our business relationships for a better and more transparent gemstone market.

Yours Faithfully,

Swiss Pearls
